

# Positive Solutions for Families Group

This group is designed to support participants with building positive and effective parenting skills.

Parents learn ways to promote their child's social and emotional development. Group facilitators provide families with information on how to understand and address challenging behavior by using strength-based interventions to help their child learn appropriate behavior.

Sessions are designed to provide family members with key strategies that may be used with children ages 3 to 6.

**For group schedule, please see our website or contact our office.**
